On October 14, 1987, the Commission issued Amendment No. 29 to License No. NFP-30 for the Callaway Plant, Unit 1, in response to your application dated June 18, 1987. The amendment revised the Technical Specifications to change the definition of the fully withdrawn shutdown and control rod position from 228 steps to 225 steps or higher.

In adding the new amendment numbers to the Technical Specifications pages, the new number was inadvertently omitted from page 3/4 1-22 in your copy only. Enclosed is a copy of the corrected page. The correction was made in all of the courtesy copies and the internal NRC distribution copies before they were dispatched.

Please accept our apologies for any inconvenience this error may have caused you.

Sincerely,

151

Thomas W. Alexion, Project Manager
Project Directorate III-3
Division of Reactor Projects
