Subject: Facility License No. R-52, Docket 50-113
Change in Physical Security Plan for the
University of Arizona Nuclear Reactor Laboratory

Notification is hereby made of the changes in our Physical Security Plan for the University of Arizona Nuclear Reactor Laboratory, subject to 10CFR50.54(p). The change describes an additional motion sensor added to the intrusion alarm system.

These changes have been reviewed by the Reactor Committee pursuant to 10CFR50.54(p)(2) and the Committee has determined that the changes do not decrease the safeguards effectiveness of the Physical Security Plan. This change appears on page 5 of revision 7 of the Physical Security Plan. This addition only changes page 5 and the title page.

Three copies of the change pages, a clean version of revision 7 dated May 2002 and the signed acceptance sheet from the Reactor Committee are submitted. The change pages show additions in italic print.

These change pages and revision 7 respectfully submitted on behalf of the University of Arizona by:

John G. Williams, Director
Nuclear Reactor Laboratory
