MEMORANDUM TO: Exam File
Exelon
LSRO - Peach Bottom / Limerick Station

FROM: Alan Blamey 
Senior Operations Engineer

SUBJECT: CHANGE TO PEACH BOTTOM (PBAPS) / LIMERICK (LGS)
STATION LIMITED SENIOR REACTOR OPERATOR EXAM
OUTLINE IN REFERENCE TO ROI 02-04.

The purpose of this memorandum is to document the change to the PBAPS / LGS exam outline in reference to the incorporation of ROI 02-04. The exam outline was reviewed in reference to ROI 02-04 and found to meet the condition specified in the ROI. The outline changes are listed below.

ROI 02-04 changes - Category A

JPM A.1-2 Was changed to specifically examine differences between PBAPS and LGS.

JPM A.3 Was changed from a JPM to 2 questions to make the task more PBAPS specific.

Written Exam (Unrelated Changes)

Question 3-12 Fuel handling equipment question changed from a PBAPS to a LGS question.

Question 3-16 Equipment control question changed from a LGS to a common question.

In both cases the K/A remained the same only the effected unit changed. The distribution of the exam is still evenly distributed among PBAPS (28%), LGS (28%) and Common (44%). Based on these changes the original ES-201-2, "LSRO Examination Outline Quality Checklist," was re-reviewed and found to be still valid. A revised ES-201-2 form will not be issued.

I. WRITTEN EXAM

A. OUTLINE: (ES-701)

Group (Sample %)	Subject area	Number of Questions
1 (15%)	Reactor and fuel characteristics and physical aspects of core construction important to fuel handling or shutdown activities	8
2 (30%)	System equipment and instruments that are important to plant safety and are located near or used during fuel handling activities or during alternate shutdown procedures	15
3 (40%)	Normal, abnormal, emergency operating and administrative procedures related to fuel handling activities	21
4 (15%)	Health physics and radiation protection for fuel handling activities and general employee responsibilities	6
100%	Totals	50
