SUBJECT: NRC's REVIEW OF KERR-McGEE's FINAL STATUS SURVEY PLAN FOR SITE  
SECTOR 12 AT THE CUSHING REFINERY SITE

Dear Mr. Lux:

I am responding to your letters dated April 1 and May 10, 2002. In the April 1 letter you requested our comments on the scope of your Final Status Survey Plan (FSSP) for Sector 12 at the Cushing Refinery Site. The stated reason for your request was that this would be the first FSSP of a number of planned FSSPs for various sectors of the site. Therefore, our feedback on the scope of the first FSSP would be beneficial to you. On May 1, 2002, we provided our comments via teleconference. In the May 10 letter you provided revision 1 of the Sector 12 FSSP. We have completed our review of this document and find the scope to be adequate.

If you have any questions or comments, please call me at (301) 415-6605.

Sincerely,
