

3 DOCKETED  
USNRCDOCKET NUMBER  
PROPOSED RULE ~~PR~~ 72  
(67 FR 14662)

April 29, 2002 (4:11PM)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Make the following typographical correction to Amendment 1 to the HI-STORM 100 CoC:

Appendix B, Table 2.1-3, Page 1 of 5:

Restore the " $\leq$ " sign preceding the values for "Design Initial U" for Fuel Assembly Array Classes 6x6A, 6x6B, and 6x6C.

This is a correction of a typographical error. This sign is currently included in Amendment 0 of the CoC and was not proposed to be changed in Amendment 1. The values for uranium mass are maximum values, which makes the " $\leq$ " appropriate. Without the " $\leq$ " sign, these values could be misconstrued to be exact limits, which is not appropriate. There is no impact on any analysis as described in the supporting safety analysis report.
