

AUG 10 1961

Mr. James T. Ramey
Executive Director
Joint Committee on Atomic Energy
Congress of the United States

Dear Mr. Ramey:

I am enclosing two copies of selected comments on site criteria received as of July 25, 1961. These comments consist of excerpts from letters which we have received commenting on the proposed reactor site criteria.

At the request of the Site Criteria Committee of the Atomic Industrial Forum, representatives of the Commission met with that committee last week to discuss site criteria.

The staff is now in the process of analyzing all public comments received. When that work is completed, we will develop another draft in cooperation with the ACES. We will also probably convene an industry advisory conference for site criteria discussion before final action on this matter by the Commission.

Additional copies of the attachment to this letter are available if you have any need for them.

Sincerely yours,

Cc: Cong. Liaison (2)
Secretariat
