Division of Inspection

WTR INCIDENT

X

Your memorandum of April 8 suggesting an investigating committee for the subject incident is acknowledged.

It does not appear that this was a serious incident as contemplated in Manual Chapter 0707-061. Nevertheless, we are gathering information, in addition to that reported by the licensee, regarding the nature and extent of the incident, and will be happy to have your representatives either participate or accompany us, depending upon the type of investigation which seems necessary. As you know, the reactor will remain shut down for several weeks as scheduled by the licensee.

cc: H m Price, agree
