

UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON 25, D. C.

January 19, 1961

MEMORANDUM FOR: Harold L. Price, Director
Division of Licensing and
Regulation.

VIA: General Manager

Subject: WTR INCIDENT

I would like some information on the WTR incident, the operation that caused it, and whether or not the project or experiment which occasioned the incident was one which was within their license authority and had previous HEB analysis and review. I assume that the experiment or operating procedure which caused the incident was reviewed by HEB, and, if this is the case, I would like a copy of the technical analysis to peruse and return to you.

A handwritten signature in cursive script that reads "L. K. Olson".

L. K. Olson
Commissioner
