**SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
TRANSMITTAL COPY OF A NON-COMPLIANCE NOTIFICATION
REPORT TO THE TEXAS NATURAL RESOURCE
CONSERVATION COMMISSION (TNRCC)**

**REF: 1) TXU Energy Letter, logged TXX-02117, from J.J. Kelley, Jr. to
TNRCC, Non-Compliance Notification Report for Comanche Peak
Steam Electric Station, dated June 13, 2002**

Gentlemen:

On June 6, 2002, approximately 350 gallons of sewage sludge was released into Squaw Creek Reservoir (cooling lake body for the facility) due to equipment damage. Actions were taken to mitigate the consequences of the event. Since the sewage sludge reached receiving waters, this incident was reported to the TNRCC-DFW Regional Office, Solid Waste Division at approximately 1610 hours. Other Reportability requirements identified that a written report was to be generated and delivered to the TNRCC within five days, and the NRC to be telephoned and advised of the event within 24 hours and a copy of the report be forwarded to the NRC. The NRC Operations Center was advised of the event at 1220 CDT in accordance with 10CFR50.72 and Environmental Protection Plan requirements.

On June 13, 2002, the five day written report was submitted to TNRCC identifying the specifics concerning exceeding permitted limits for the specified outfall and was delivered to the state agency.

TXX-02118

This letter transmits to the NRC a copy of the non-compliance notification report that was sent to the TNRCC in accordance with CPSES's Environmental Protection Plan, section 4.1 and section 5.4.2.

Attachment 1 contains the report as sent to the Texas Natural Resource Conservation Commission as transmitted via TXX-02117. If you have any further inquiries or questions please contact Mr. Rutledge at 214-812-8477 or Mr. Turner at 254-897-8901.

Non-Compliance Notification

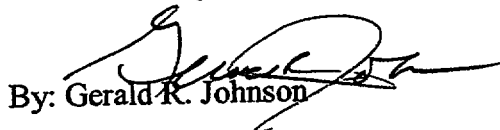

Dear Ms. Kennedy:

Attached is a non-compliance notification concerning the release of sewage sludge which was reported to you in a telephone notification on 6 June 2002 by Mr. David Rutledge of TXU Environment, Health and Safety Department.

If you have any questions concerning this matter, please contact Mr. Rutledge at 214-812-8477 or by e-mail at d.rutledge@txu.com.

Sincerely,

James J. Kelley, Jr.

**TXU ELECTRIC COMPANY
NON-COMPLIANCE NOTIFICATION**

PLANT NAME: Comanche Peak Steam Electric Station

TPDES PERMIT # 01854
EPA ID # TX0065854

LOCATION: On the west side of Squaw Creek Reservoir along FM Road 56 and approximately four (4) miles northwest of the City of Glen Rose, Somervell County, Texas.

MAILING ADDRESS: 1601 Bryan Street
Dallas, Texas 75201-3411

RESPONSIBLE MANAGER: Randy Morrison
PHONE: (817) 897-5590

OUTFALL: 003/003 - Sanitary Sewage Effluents

DISCHARGE PARAMETER: Sludge Release

DATE/TIME OF -
NON-COMPLIANCE: 06/06/2002 15:00

EXPLANATION OF CAUSE: A sewage sludge clean-out connection was Inadvertently damaged with a Bobcat while attempting to remove storm water runoff sediment from a drainage ditch near the Domestic Waste Treatment Building. Approximately 350 Gallons of sludge was released from the broken connection. Only about 50 gallons is believed to have reached the Squaw Creek Reservoir.

CORRECTIVE ACTION: The immediate response was the construction of earthen dikes to contain the released sludge, and then it was pumped back into the treatment system. Site is investigating additional stabilization of the nearby embankment to further reduce the sediment contribution to the drainage ditch, thus eliminating/reducing the necessity to clean sediments from this area.
