Docket Nos. 50-266
and 50-301

REGULATORY DOCKET FILE COPY

Mr. Sol Burstein
Executive Vice President
Wisconsin Electric Power Company
231 West Michigan Street
Milwaukee, Wisconsin 53201

Dear Mr. Burstein:

The Commission has issued the enclosed Amendment No. 48 to Facility Operating License No. DPR-24 and Amendment No. 54 to Facility Operating License No. DPR-27 for the Point Beach Nuclear Plant, Unit Nos. 1 and 2, respectively. The amendments are in response to your application transmitted by letter dated March 6, 1981 for the Safeguards Contingency Plan identified as Chapter 8 to the Point Beach Nuclear Plant Physical Security Plan.

These amendments revise license condition 3.F. to include the NRC approved Safeguards Contingency Plan as the revised Chapter 8 to the Physical Security Plan and pursuant to 10 CFR 73.40(b) full implementation of this plan shall be within 30 days of this approval by the Commission.

We have concluded that your Safeguards Contingency Plan when fully implemented, will provide the protection needed to meet the general performance requirements of 10 CFR 50.54(p) and 10 CFR 73.40(b). We have reviewed the plan against the requirements of Section 73.55(b) and Appendix C to 10 CFR Part 73 and have determined that the plan:

- (1) sets forth decisions and actions satisfying the stated objectives of contingency plans,
- (2) identifies data, criteria, procedures and mechanisms to carry out these decisions and actions, and
- (3) specifies individuals, groups or organizational entities responsible for each such decision and action.

Therefore, based on the above, we have determined that your Safeguards Contingency Plan is acceptable.

Changes which would not decrease the effectiveness of your approved Safeguards Contingency Plan may be made without approval by the Commission pursuant to the authority of 10 CFR 50.54(p). A report containing a description of each change shall be furnished to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a copy to the appropriate NRC Regional Office within two months after the change is made. Records of changes made without Commission approval shall be maintained for a period of two years from the date of the change.

The amendments apply to the Safeguards Contingency Plan and therefore do not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendments involve an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR 51.5(d)(4) that an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendments.

Since the amendments apply to the Safeguards Contingency Plan, they do not involve significant new safety information of a type not considered by a previous Commission safety review of the facility. They do not involve a significant increase in the probability or consequences of an accident, do not involve a significant decrease in a safety margin, and therefore do not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action and that the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.

We will continue to withhold the Point Beach Nuclear Plant Physical Security Plan and other related correspondence from public disclosure in accordance with the provisions of 10 CFR 2.790(d).

A copy of the Notice of Issuance is enclosed.

Sincerely,

Robert A. Clark, Chief
Operating Reactors Branch #3
