

WOLF CREEK NUCLEAR OPERATING CORPORATION

Britt T. McKinney
Vice President Operations

JUN 27 2002

WO 02-0032

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

Reference: Letter WO 01-0038, dated September 27, 2001, from B. T. McKinney, WCNOG, to USNRC

Subject: Docket No. 50-482: Modification to Application for Amendment to Revise Technical Specification 5.3, "Unit Staff Qualifications"

Gentlemen:

The Reference submitted an application to amend Technical Specification (TS) 5.3, "Unit Staff Qualifications, for the Wolf Creek Generating Station (WCGS), Unit No. 1, Facility Operating License No. NPF-42, in accordance with 10 CFR 50.90.

The Reference proposed to revise TS Section 5.3, "Unit Staff Qualifications," Specification 5.3.1 to specify an exception that requires licensed operators to comply with the requirements of the National Academy for Nuclear Training guidelines for initial training and qualification in lieu of ANSI/ANS 3.1-1981 as endorsed by Regulatory Guide 1.8, Revision 2. Specification 5.3.1.1 was proposed to be revised to state:

"Licensed Operators and Senior Operators shall meet or exceed the qualifications of the National Academy for Nuclear Training, "Guidelines for Initial Training and Qualification of Licensed Operators," January 2000."

Based on discussions with the Institute of Nuclear Power Operations (INPO) personnel and NRC personnel, Specification 5.3.1.1 is being revised to state:

"The education and experience eligibility requirements for operator license applicants, and changes thereto, shall be those approved by the NRC and described in an applicable station procedure."

The NRC has published NRC Regulatory Issue Summary (RIS) 2001-01, "Eligibility of Operator License Applicants," dated January 18, 2001, "to familiarize addressees with the NRC's current guidelines for the qualification and training of reactor operator (RO) and senior operator (SO) license applicants." Regulatory Issue Summary (RIS) 2001-01 makes the following statements:

"The fact that every facility licensee has voluntarily obtained and periodically renewed the accreditation of its licensed operator training program suggests that every facility licensee is implementing the education and experience guidelines endorsed by the NNAB. The NRC staff understands that the current version of those guidelines are outlined by the National Academy for Nuclear Training (NANT) in its 'Guidelines for Initial Training and Qualification of Licensed Operators,' (NANT 2000 guidelines) which were issued in January 2000."

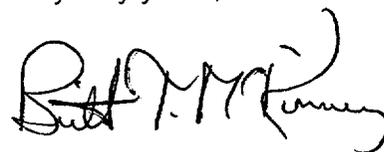

". . .the NANT's guidelines for education and experience (those that were in effect in 1987 or those that were issued in January 2000) outline acceptable methods for implementing the Commission's regulations in this area."

As such, Wolf Creek Nuclear Operating Corporation (WCNOC) requests the NRC approve the methods described in the National Academy for Nuclear Training, "Guidelines for Initial Training and Qualification of Licensed Operators," dated January 2000, for meeting the education and experience eligibility requirements.

The proposed changes to Specification 5.3.1.1, provided in Attachment II, supercede the changes proposed in Attachment III of the Reference. The proposed change to Specification 5.3.1.1 provided in this submittal does not impact the conclusion of the No Significant Hazards Consideration provided in the Reference.

There are no licensing commitments contained in this submittal. In accordance with 10 CFR 50.91, a copy of this submittal is being provided to the designated Kansas State Official. If you should have any questions regarding this submittal, please contact me at (620) 364-4433, or Mr. Tony Harris at (620) 364-4038.

Very truly yours,

Britt T. McKinney

5.0 ADMINISTRATIVE CONTROLS

5.3 Unit Staff Qualifications

5.3.1 Each member of the unit staff shall meet or exceed the minimum qualifications of ANS/ANS 3.1-1978 with the following exceptions:

5.3.1.1 ~~Licensed Operators and Senior Operators shall meet or exceed the qualifications of ANS/ANS 3.1-1981 as endorsed by Regulatory Guide 1.8, Revision 2, and 10 CFR Part 55.~~

5.3.1.2 The position of Manager Chemistry/Radiation Protection shall meet or exceed the qualifications of Regulatory Guide 1.8, September 1975 for a Radiation Protection Manager.

5.3.1.3 The position of Manager Operations shall hold or have previously held a senior reactor operator license for a similar unit (PWR).

5.3.2 For the purpose of 10 CFR 55.4, a licensed Senior Reactor Operator (SRO) and a licensed reactor operator (RO) are those individuals who, in addition to meeting the requirements of TS 5.3.1, perform the functions described in 10 CFR 50.54(m).

The education and experience eligibility requirements for operator license applicants, and changes thereto, shall be those approved by the NRC and described in an applicable station procedure.
