SUMMARY: The plant entered June at 100% power and remained at 100% until approximately 20:05 on 6/14/02, when power was reduced to approximately 50% to allow for troubleshooting and identification of a leaking main condenser tube. Power was restored to 100% at approximately 11:08 on 6/16/02. Notification of the grid operator occurred at 20:36 on 6/13/02, resulting in this power reduction being classified as "unplanned". The plant remained at a nominal 100% power level during the remainder of the month.
