Dockets Nos. 50-266
and 50-301

Wisconsin Electric Power Company
ATTN: Mr. Sol Burstein
Executive Vice President
231 West Michigan Street
Milwaukee, Wisconsin 53201

Gentlemen:

The Commission has issued the enclosed Amendments Nos. 33 and 37 to Facility Operating Licenses Nos. DPR-24 and DPR-27 for the Point Beach Nuclear Plant, Units Nos. 1 and 2. The amendments consist of changes to the Technical Specifications and are in accordance with NRC letter dated July 29, 1977.

These amendments delete Section 15.6.12, Respiratory Protection, of the Technical Specifications. Our letter to you dated July 29, 1977 has described the basis for these license amendments. The amendments are administrative changes in the licenses. You have concurred in this action by not presenting written objection as suggested in our July 29, 1977 letter.

We have evaluated the potential for environmental impact of plant operation in accordance with the enclosed amendments. Since the amendments apply to administrative details, we have determined that the amendments do not authorize a change in effluent types or total amounts nor an increase in power level, and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendments involve an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR §51.5(d)(4) that an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

The amendments do not involve significant new safety information of a type not considered by a previous Commission safety review of the facility. They do not involve a significant increase in the probability or consequences of an accident, do not involve a significant decrease in a safety margin, and therefore do not involve a significant hazards
