SUMMARY OF INFORMATION COLLECTION REQUEST

Title: 10 CFR Part 30, Rules of General Applicability to Domestic Licensing of Byproduct Material

Current Burden/Responses: 160,919 hours/2,285 responses

Proposed Burden/Responses: 195,889 hours/27,889 responses (20,583 Recordkeepers)

Frequency of Response: One-time; Every 10 years

Number of Respondents: 7,306

Reasons for Changes in Burden/Responses: The overall burden has increased by 38,470 hours from 160,919 hours to 199,389 hours. The increase is primarily due to the addition of 1 Agreement State and the increase in the number of Agreement State licenses from 15,847 to 16,253. The estimated number of Agreement State licenses is expected to increase at a ratio of 3.4 times that of NRC Licensees.

The overall reporting burden increased by 28,464 hours from 58,930 hours to 87,394 hours because of the increase in the number of Agreement States licensees from 15,847 to 16,253, with a corresponding increase in the number of responses and burden for sections 30.35(a)&(b); 30.36(g), and 30.50. This burden also increased because of the incorporation of sections 30.51(d)&(f) and 30.55(c) which were inadvertently omitted from the last clearance package. While the overall burden for Agreement States licensees increased by 28,292 hours, the burden for NRC licensees increased by only 172 hours, from 19,783 hours to 19,955 hours. Although the overall burden for NRC licensees increased by 176 hours, the burden per response for section 30.34(b) was reduced from 2 hours to 30 minutes, with a corresponding net burden reduction. The decrease in burden per response is based on NRC's re-estimate of the time required to gather and prepare the information required to notify the NRC of proposed license transfers.

The overall recordkeeping burden increased by 10,206 hours from 101,789 hours to 111,995 hours because of the increase in the number of Agreement States licensees from 15,847 to 16,253, and in the number of recordkeepers for sections 30.34(e)(4) and 30.34(g). Although the recordkeeping burden for Agreement States licensees increased by 13,208 hours (from 74,129 to 87,337 hours), the burden for NRC licensees decreased by 3,202 hours (from 27,860 hours to 24,658 hours), primarily because of the reduction in the number of license transfers and terminations for Sections 30.41(c)&(d) and 30.51.

There was change in cost because the hourly rate increased from \$121 to \$152.

IRCAS was searched, no duplication was found.

Abstract: 10 CFR Part 30 establishes requirements that are applicable to all persons in the United States governing domestic licensing of radioactive byproduct material. The application, reporting and recordkeeping requirements are necessary to permit the

NRC to make a determination whether the possession, use, and transfer of byproduct material is in conformance with the Commission's regulations for protection of the public health and safety.
