

July 19, 2002

APPLICANT: Virginia Electric and Power Company

FACILITY: North Anna Power Station, Unit Nos. 1 and 2

SUBJECT: SUMMARY OF PUBLIC MEETING HELD TO DISCUSS THE DRAFT
SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT REGARDING
LICENSE RENEWAL FOR THE NORTH ANNA POWER STATION,
UNIT NOS. 1 AND 2

On Tuesday, June 25, 2002, members of the U.S. Nuclear Regulatory Commission (NRC) staff held public meetings in Louisa, Virginia, to discuss the staff's draft Supplemental Environmental Impact Statement (SEIS) regarding license renewal for the North Anna Power Station (North Anna), Unit Nos. 1 and 2. The staff prepared the draft SEIS in response to the application submitted by Virginia Electric and Power Company (VEPCo) for renewal of the operating licenses for North Anna, Unit Nos. 1 and 2. Afternoon and evening sessions were held to allow maximum public participation. Formal presentations were made by John Tappert, Omid Tabatabai, and Andrew Kugler of the NRC staff, and Eva Hickey of Pacific Northwest National Laboratory, working under contract to the NRC.

Enclosure 1 is the corrected transcript for the afternoon meeting and Enclosure 2 is a corrected transcript for the evening meeting. Enclosure 3 is a copy of the NRC staff's presentation slides. Enclosure 4 is the List of Attendees for both the afternoon and evening sessions.

The purpose of the meetings was to provide the public with a summary of the NRC staff's findings in the draft SEIS and give them an opportunity to provide comments on the draft. The SEIS is a North Anna plant-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants" (NUREG-1437). Each meeting was preceded by a 1-hour "open house" to allow members of the public to talk to the staff in a less formal setting.

The staff presentations in the meetings outlined the overall license renewal process, provided a description of the National Environmental Policy Act review process, summarized the results of the staff's review (as documented in the SEIS), and gave information concerning the means available to the public to submit comments. The comment period on the draft SEIS runs until August 1, 2002.

After the formal presentations given by the NRC staff, members of the public were invited to provide comments. Officials from VEPCo were also given the opportunity to address the audience and provide comments focusing on the environmental report that was submitted as part of the license renewal application and on VEPCo's evaluation of the results of the NRC staff's review. Approximately 50 people attended the two sessions with 17 persons making comments. Attendees included representatives of the NRC; VEPCo and nuclear industry; local government officials; the press; and other members of the public.

The NRC staff will review the comments that were made at the meetings, along with any other comments submitted to the NRC during the comment period. The staff will then revise the SEIS, as appropriate, and issue the final version by December 2002.
