Attn: Document Control Desk

Subject: Revision to the Response to Order for Interim Safeguards and Security  
Compensatory Measures  
Cooper Nuclear Station, NRC Docket 50-298, License No. DPR-46

Reference: 1) Nebraska Public Power District Letter (NLS2002030) dated March 18,  
2002, to U.S. Nuclear Regulatory Commission, "Response to Order for  
Interim Safeguards and Security Compensatory Measures"

The purpose of this letter is to transmit a revision to the Nebraska Public Power District's (NPPD) response to the Nuclear Regulatory Commission's (NRC) February 25, 2002, Order for Interim Safeguards and Security Compensatory Measures (Order) for the Cooper Nuclear Station (Reference 1). NPPD hereby revises one Interim Compensatory Measure (ICM) of the Order and provides additional text that provides clarification for another ICM response related to current practices at the Cooper Nuclear Station.

A recent correspondence from a government authority prompted a revision to our response related to an ICM. Additionally, text associated with our response to another ICM is being supplemented to reflect a current station activity, which is more conservative than the requirements of the February 25, 2002, Order. NPPD deems this information important regarding your awareness of our current protective practices.

These revisions to our response are described in the attachment to this letter. The enclosure to this letter provides an updated response, in its entirety, with the revision and addition to the response indicated by change bars in the margin. This enclosure is provided for your convenience, in order that you may reference a single document to determine the status of the NPPD response to the Order.
