OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

To The RuleMaking & Adjudications Staff of the Secretary of the U.S. Nuclear Regulatory Commission:

**Never allow radioactive waste to ever be used in household items, finished goods, or raw materials! Don't enable mining of it, allow moves to reprocess it, or move it off sites it is already on; IT'S NUKE WASTE- THE WORST LIFE-THREATENING STUFF IN THE UNIVERSE!**

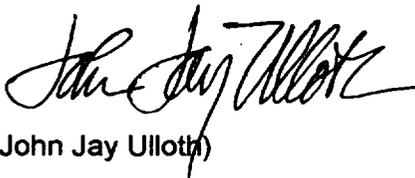

In the name of homeland security, you must not enable nuke shipments that will spread death, generations of cancer & birth defects across America- this is what America's enemies want! But the N.R.C. has the power to prevent it... and you at the N.R.C. must do so immediately by **REJECTING "Exemption Tables"** and the false definition of "radioactive materials" proposed in 10 CFR 71 Nuclear Transport Regulations. You know there is no "low level" vs. "high level" nuke waste because **THERE IS NO SAFE THRESHOLD FOR EXPOSURE TO ANY QUANTITY OF RADIOACTIVE MATERIALS; THERE IS NO CURE FOR EXPOSURE, RESULTING GENETIC DAMAGE IS PERMANENT AND CUMULATIVE- EVEN TO FUTURE GENERATIONS! THAT'S SCIENCE TRUTH, NOT POLITICAL FANTASY! WITH HALF-LIVES WELL BEYOND THE LONGEVITY OF ANY GOVERNMENT IN WORLD HISTORY, NUKES ARE THE WORST STUFF ON EARTH, PERIOD!**

**REFUSE ALL SHIPMENTS & PACKAGES OF NUKE MATERIALS- UNLESS YOU CAN GUARANTEE THEY WILL NEVER CONTAMINATE THE CONTAINERS THEY'RE IN, NEVER HURT COMMUNITIES THEY PASS THROUGH, WILL NEVER BE LOST, OR DISPERSED INTO THE MARKETPLACE AFTER SHIPMENT; dilution is not a solution! POST-9/11, U.S. MILITARY GUARD (not rent-a-cops) IS ABSOLUTELY ESSENTIAL FOR NATIONAL SECURITY- the risk is currently unacceptable. Track, label, & publicly report all radioactive shipments of any kind- without exemption- including shipments being made in secret without the consent of the American public. This is not a dictatorship, we have the right to know. "Harmonization"- the same character of false argument Nazis made at Nuremberg- is no justification for nuking Americans; there is no right way to do this wrong thing.**

As you are well aware, the risk of highway accidents or radiation emanating from trucks while "stuck in traffic" is very very high, and Union Pacific Railroad has "lost" carload freight- even in the recent past. You have no right to deceive the American public. You have no right not to inform transportation workers, police, health care professionals (especially Emergency Medical Technicians first on the scene) of what it's like to die from radiation (many did at Chernobyl), and give them the choice to refuse to be party to the risk. Hospital & local government administrators are NOT trained or prepared to handle nuke leaks, spills, or disasters- the public has a right to know that accidents of radioactive shipments are a mathematical certainty, and be given the right to refuse them.

Even though I strongly object to any nuke shipments of any kind, even the secret ones must be guarded by U.S. military forces, never 'private security' "rent-a-cops;" we are too close to 9/11 to risk any less.

Very Truly Yours,

(John Jay Ulloth)

P.S. Yucca Mountain- posing as a national nuke dump- is cracked and unuseable- you must never enable nuke shippers to reach it for all the same reasons.
