SUBJECT: PACKAGE PERFORMANCE STUDY MEETING REQUEST

Dear Ms. Sattler:

I am writing in response to your June 21, 2002, letter regarding the U.S. Nuclear Regulatory Commission's (NRC's) Package Performance Study (PPS) for spent fuel transportation and the associated public outreach efforts. As I mentioned at the June 19, 2002, meeting of the Southern States Energy Board's radioactive materials transportation committee, NRC will soon issue a PPS Test Protocols Report for public comment. It will describe the conceptual level impact and fire tests that are currently planned, and will be the first major PPS document since the 2000 Issues Report, which was issued prior to the last set of public meetings. The NRC continues to value feedback from NRC's stakeholders and the public in developing the PPS tests. In this connection, we welcome and support your suggestion to add a PPS meeting on the protocols in Chicago, Illinois. We hope you would be willing to work with us to promote adequate attendance.

Delays in finalizing the protocols report has forced NRC to postpone the August meetings in Nevada and Maryland, although they will likely still be held in 2002. A Chicago meeting will be added as part of the rescheduling effort.

If you have any questions, please call Robert Lewis at (301) 415-8527 or me at (301) 415-8500.

Sincerely,

/RA/
Charles L. Miller, Deputy Director
Spent Fuel Project Office
Office of Nuclear Material Safety
and Safeguards
