

NUCLEAR REGULATORY COMMISSION

10 CFR Chapter I

RIN 3150-AF61

Electronic Maintenance and Submission of Information

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) proposes to amend its rules to clarify when and how licensees and other members of the public may use electronic means such as CD-ROM and e-mail to communicate with the agency. These amendments are necessary to implement the Government Paperwork Elimination Act (GPEA). In the Rules and Regulations section of this Federal Register, the NRC is publishing a direct final rule on this subject, because the Agency views this action as noncontroversial and anticipates that it will not receive significant adverse comments. A detailed rationale for the rulemaking is set forth in the direct final rule notice. If the NRC does not receive any significant adverse comments on this rule, then the rule will become final without further proceedings. If the NRC receives significant material and adverse comments, the direct final rule will be withdrawn and the NRC will address all public comments received in a later final rule based on this proposed rule. The NRC will not begin a second comment period. At the same time that the NRC is proposing to amend its rules, it is also making available guidance on how to submit documents to the agency electronically. The guidance is appended to the Federal Register publication of the direct final rule. When the final rule becomes effective, this new guidance document will supersede earlier guidance on electronic submissions.

DATES: The comment period for this proposed rule ends on (insert date 45 days after publication in the Federal Register). Comments received after that date will be considered if it

is practical to do so, but the NRC is able to ensure only that comments received on or before this date will be considered. The NRC staff will hold a public meeting to answer questions on issues arising from this action on October 3, 2002.
