Subject: RE: CPPU Issues and TPO FAC Question

I relayed your comments to George re: draft slides, the reload emphasis, and a proprietary call. (Also, WP problems and secure electronic transmittals)

He had communications with Paul Bonner regarding the "reload" interest. He said the slides would be the same as before except for 2 or 3 added to cover "reload".

Please call me if you need something. If I can't do it myself, I will try to expedite it.

George has taken off this afternoon and Tuesday. I will send you the note on the disposition logic first thing tomorrow AM.

Jim H

Thanks. Sorry to be hard to find last week. I left for leave and should've left a note. I'll confirm for you that we're all set on the TPO questions.

Joe

Dear Joe:

I have attached a zip file that includes a discussion of 6 Draft SER Issues. <<CPPU Issues.zip>> The 3 files included in the zip are the same except for different formats. Extracting the files requires a password. I left you a phone message with the password.

We are continuing our review to identify all technical comments, but the some of 6 issues included above are more significant.

Did the TPO FAC question get resolved and do you need anything else from me?

Regards,
Jim H
