Mr. Robert H. Idhe  
Duke COGEMA Stone & Webster  
P.O. Box 31847  
Charlotte, NC 28231-1847

SUBJECT: ACCEPTANCE REVIEW OF THE ENVIRONMENTAL REPORT FOR  
THE DUKE COGEMA STONE & WEBSTER MIXED OXIDE FUEL  
FABRICATION FACILITY

Dear Mr. Idhe:

The U.S. Nuclear Regulatory Commission staff received your Mixed Oxide Fuel Fabrication Facility Supplemental Environmental Report (ER) on July 11, 2002. We have performed an acceptance review on the ER to determine if sufficient information is provided to begin staff technical review. Staff has determined that the ER generally addresses the requirements for ERs listed in 10 CFR Part 51, and the items listed in the "Standard Review Plan for the Review of an Application for a Mixed Oxide (MOX) Fuel Fabrication Facility," NUREG-1718, Appendix F, "Environmental Report Content."

The ER is therefore accepted for technical review. Please note that the complete technical review may identify omissions in the submitted information or technical issues that require additional information. Based on our acceptance review, and projection of current review schedules, we anticipate forwarding a request for additional information to you in early October 2002. If you have any questions related to this letter, or the ER review, please contact Tim Harris at (301) 415-6613.

Sincerely,
