Ref: Yucca Mountain Review Plan (Nareg-1809, Revision 2)

Dear Mr. Lesar:

The current Yucca Mountain Plan omits consideration of key technical issues:

1. Those people near the transportation routes will be adversely affected by this radioactive waste.

2. If opened, Yucca Mountain will contaminate the groundwater of Amargosa Valley.

~~This draft omits consideration of the fact that supply drinking water to the Amargosa Valley.~~

The review plan referenced above does NOT address these issues. Please see reports from ~~the Amargosa Valley~~

regarding water supplies.
