SUBJECT: CORRECTION TO NRC LETTER OF SEPTEMBER 19, 1991 REISSUING AMENDMENTS 65 AND 64 FOR DIABLO CANYON NUCLEAR POWER PLANT, UNIT NOS. 1 AND 2 (TAC NOS. 79427 AND 79428)

By letter dated September 5, 1991, the Commission issued Amendment No. 65 to Facility Operating License No. DPR-80 and Amendment No. 64 to Facility Operating License No. DPR-82 for the Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, respectively. The amendments changed the combined Technical Specifications for Diablo Canyon in response to your application dated December 21, 1990 (Reference LAR 90-13).

Because of an administrative oversight, the amendments issued on September 5, 1991 included Technical Specification pages printed on one side only, which is inconsistent with previously issued amendments for the Diablo Canyon combined Technical Specifications. Therefore, by letter dated September 19, 1991, the Technical Specification pages changed by Amendments 65 and 64 were reissued in a two-sided format, including overleaf pages where appropriate. The reissued Technical Specification pages were correct; however, the September 19, 1991 cover letter transmitting the corrected pages contained erroneous information.

The purpose of this letter is to correct the errors in the September 19, 1991 transmittal letter. Specifically, the September 19 letter incorrectly indicates that Amendments 65 and 64 were issued on September 3, 1991. The actual date of issuance for these amendments was September 5, 1991. Also, the September 19 letter incorrectly states that these amendments are in response to your application dated November 16, 1989 (Reference LAR 89-15). The amendments are in response to your application dated December 21, 1990 (Reference LAR 90-13). We regret any inconvenience that these errors may have caused. If you have any questions regarding this matter, please contact me.

Sincerely,
