C. Power Reactors

The approximately \$273.6 million in budgeted costs to be recovered through FY 2002 annual fees assessed to operating power reactors would be divided equally among the 104 operating power reactors. This results in a proposed FY 2002 annual fee of \$2,630,000 per reactor. Additionally, each operating reactor would be assessed the proposed spent fuel storage/reactor decommissioning annual fee, which for FY 2002 is \$239,000. This would result in a total FY 2002 annual fee of \$2,869,000 for each operating power reactor.

D. Spent Fuel Storage/Reactor Decommissioning

For FY 2002, budgeted costs of approximately \$28.9 million for spent fuel storage/reactor decommissioning are to be recovered through annual fees assessed to Part 50 power reactors, ~~except those reactors in decommissioning who do not have spent fuel on site~~ and to Part 72 licensees who do not hold a Part 50 license. The costs would be divided equally among the 121 licensees, resulting in a proposed FY 2002 annual fee of \$239,000 per licensee.

These reactor licensees that have ceased operations and have no fuel on site are not subject to annual fees.

~~not subject to these annual fees to recover budgeted costs for spent fuel storage/reactor decommissioning costs~~

Approximately \$285,200 in budgeted costs is to be recovered through annual fees assessed to the non-power reactor class of licensees for FY 2002. This amount would be divided equally among the four non-power reactors subject to annual fees. This results in a proposed FY 2002 annual fee of \$71,300 for each licensee.
