Subject: **Revisions to the "Security Plan for the Protection of Reactor Facilities Under License R-33" dated March, 1998**

Reference: Docket 50-073, License R-33

Gentlemen:

Enclosed are revised pages to the "Security Plan for the Protection of Reactor Facilities Under License R-33." These revisions describe a new badging and site access system for the Vallecitos Nuclear Center (VNC).

There are no changes in access control to the actual reactor facilities. A brief description of each change is included in Attachment A. Revisions are enclosed as Attachment B to this letter. Changes are marked with a vertical line in the left-hand margin. The changes do not result in any decrease in the effectiveness of the security plan.

Since the enclosed plan contains information concerning the safeguarding of reactor facilities, VNC requests that it be withheld from public disclosure pursuant to 10CFR2.790(d).

If further information is required, please contact the undersigned at 925-862-4455 or 925-862-4469, respectively.

Thank you,

Chris Hamilton
Senior Licensing Engineer
