Subject: Finite Element Gap Analysis of Davis-Besse CRDM Penetrations

Stephen-

During yesterday's discussions with the NRC staff regarding the Davis-Besse CRDM nozzle penetrations, Davis-Besse management said it would forward new information to the NRC staff today and follow it up by docketed letter.

Attached is the Structural Integrity Associates calculation package for the Finite Element Gap Analysis of CRDM Penetrations.

Doug Pickett requested that I send this to you since he is out of the office this afternoon, and request that you forward it on to W. Bateman, A. Hiser, J. Strosnider, and J. Zwolinski. Should any of these individuals have problems opening this attachment due to its size, please call me at 414-321-7120 and I will fax them a copy. Thank you for your assistance.
-Dale Wuokko
