Subject: Re: SLIDE Friday

Mark,

According to the last agenda distributed by Jake (which hasn't changed, has it Jake?), you are the first presenter for the NRC. My pieces are the (deterministic) technical assessment and the Bulletin response reviews.

Allen

Larry,

Attached is my slide for Friday. It appears as if we each have about 14 minutes max for each sub-topic. I will cover the adequate protection logic and a nutshell of the risk perspective. I will bring backup staff if people want to go into detail.

From the agenda, it appears as if Allen will cover the subjects. We will be in the audience to support.

Thanks,

Mark

Adequate Protection

Special Circumstance

Risk

Deterministic Standards

Risk Perspective

$CDF = IEF \times CCDP$

$CCDP = 10^{-2}$ to 10^{-3}

IEF, Considerable Uncertainty: $10^{-4}/ry$ to $10^{-1}/ry$

Insufficient information to conclude there is reasonable assurance of adequate protection
