Allen,

HELP !!! I know you are most probably the lead technical person on this and I'm sure Bill Bateman will want you to attend. I thought you were going to be out of the office on the 22nd. At least the e-mail you sent me said that - so I asked the licensee to change to the 23rd. So - -let me ask this: which day is it??

Thnkas,  
Stephen

Stephen:

*NRC*

My plan has been to be out of the office that day, but I will be in the rest of the week.

Allen

To All:

*NRC*

Davis-Besse has requested a meeting on January 23, 2002 at 10:30 a.m., to present to the NRC their plans for the inspection, flaw evaluation, and repair (if necessary) of the Rx pressure vessel head CRDM nozzles during their upcoming refueling outage scheduled to begin on Feb. 16th 2002. The estimated length of the meeting is 2 hours. The date and time are tentative and I am waiting confirmation from the licensee. Please let me know if this date/time will coincide with your schedules and who will be attending. Once I have confirmation from both the staff and the licensee I will proceed with a meeting notice.

Thank you,  
Stephen Sands (Davis-Besse PM, PD3-2)
