Subject: Re: Proposed meeting with Davis-Besse to discuss plans for inspection of RPVH CRDM nozzles

I don't believe SPSB needs to be represented at this meeting, although some staff may attend for information purposes.

To All:

Davis-Besse has requested a meeting on January 23, 2002 at 10:30 a.m., to present to the NRC their plans for the inspection, flaw evaluation, and repair (if necessary) of the Rx pressure vessel head CRDM nozzles during their upcoming refueling outage scheduled to begin on Feb. 16th 2002. The estimated length of the meeting is 2 hours. The date and time are tentative and I am waiting confirmation from the licensee. Please let me know if this date/time will coincide with your schedules and who will be attending. Once I have confirmation from both the staff and the licensee I will proceed with a meeting notice.

Thank you,
Stephen Sands (Davis-Besse PM, PD3-2)
