Carol -

Yesterday you indicated an interest in having a telecon to better understand the licensee's commitments in their 11/30/01 letter regarding CRDM penetration inspections during their February outage. Specifically, you mentioned the impact of the licensee limiting destructive examination of identified flaws via ALARA principles.

Both Allen Hiser and I are available today and Monday to discuss this with you and/or your staff. If you could suggest a time we can work towards that .

Thanks

Doug Pickett
