**Subject:** Fwd: Re: Inspections of Davis-Besse's commitments

Based on my review of the Davis-Besse commitments, one item stands out a bit: the dedicated operator. Doug Simpkins and I have found out that this is not an additional operator or even a "staged" operator. The way this will be implemented is that one of the non-licensed operators each day will be assigned and briefed that he/she is the "dedicated operator" for low pressure recirc. This operator will still have other duties and will go on rounds, etc. Wanted to make sure this was consistent with your understanding.

Christine
