Subject: YOUR CHANGE

Allen,

Just want to let you know that the change you suggested re: replacing the word "weld" with "flaw" in the paragraph containing the discussion of the violation of TSs has been changed in the D.C. Cook 2 order and will be changed in the Davis-Besse order that we send to the licensee. The Order attached to the memo from Sam to the EDO has the old wording in it (didn't have enough time to change). The important thing is that the orders that are issued to the licensees will contain the proper wording.
