Subject: Small changes to cover letter and order

Larry.....I was visited by Dave Loveless of EDO staff....They would like a sharply focused paragraph on why December 31st etc.....I said we can justify today to shut these plants down however we are exercising discretion noting it would clearly be punitive to immediately shut a plant down and they sit there for a month waiting to obtain the correct inspection equipment etc.....Put a sharply crafted paragraph in cover letter to commission.....work with Brian as necessary and we should probably consider possibly including in Order, not mandatory...good luck.....Z
