RE: Nuclear Regulatory Commission (NRC) Docket #72-26-ISFSI - Proposed Pacific Gas & Electric Diablo Canyon Power Plant Independent Spent Fuel Storage Installation (ISFSI)

Dear Judges Bollwerk, Kline, and Lam:

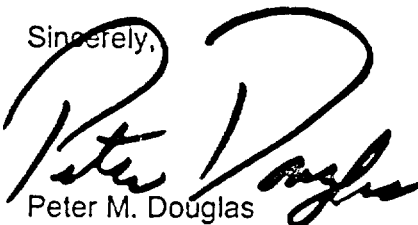

I write on behalf of the California Coastal Commission to request that full public hearings be held on all issues related to the expanded storage and ultimate relocation of radioactive waste generated by the Diablo Canyon nuclear power plant in San Luis Obispo County.

The Coastal Commission is responsible for carrying out regulatory requirements pursuant to the California Coastal Act and processing federal consistency reviews of federal actions, including permits and licenses, that affect coastal resources pursuant to the federal Coastal Zone Management Act. Although the Commission lacks jurisdiction to address nuclear safety issues relating to the storage and transportation of radioactive material used at the plant, the Commission will likely have regulatory review responsibility relative to other aspects of any development on site or elsewhere in the coastal zone in support of expanded storage or transportation of the material.

The Commission is very concerned about potential impacts of the activity on coastal resources. Given the complexity and importance of the issues associated with the proposed project, the Commission thinks it is important to generate as much analytical and substantive documentation as is necessary to fully inform the decision-making process both at the NRC and the Commission. The Commission has found that providing the public an opportunity to fully participate in matters of great public interest is a most effective way to ensure that all the relevant issues are identified, carefully analyzed, and adequately considered before final decisions are made.

Thank you for your consideration of this request. If you have any questions please call me at (415) 904-5201.

Sincerely,

Peter M. Douglas
Executive Director

Gentlemen:

We are strongly opposed to increased storage of nuclear wastes at the Diablo Canyon Nuclear Power plant here in San Luis Obispo County. Such storage presents unacceptable dangers to all of us surrounding residents. The plant itself is hazardous enough, but increasing storage of wastes on site in dry casks multiplies the already existing dangers. Please do not allow this increased waste storage.
