Subject: Part N Peer Review

If you received this message then your email address is on the distribution list for Part N and associated draft documents.

Please find attached the revised draft Part N, Rationale, Matters for Future Consideration, and Implementation Guidance for peer review. The changes made to Part N as a result of the last peer review were substantial enough to warrant another peer review cycle. The Rationale and Matters for Consideration are not for peer review but are provided to assist in the peer review process.

The previous draft Part N was not approved or disapproved by the CRCPD Board of Directors, but additional work on the draft was recommended. SR-5 has attempted to address all expressed concerns. The changes were extensive enough that another Peer Review is deemed necessary. Although not required it is requested that you please restrict your Peer Reviewer comments to those items that have been changed since the 2001 peer review. Peer Reviewers and involved federal agencies will have 60 days for review and comment of both Part N and its Implementation Guidance upon official request from the CRCPD Office of Executive Director in Frankfort, KY. For clarification, the Implementation Guidance will become a CRCPD approved companion document with Part N.

Most of the recipients of this message were Peer Reviewers during the last Part N revision effort (2001) so please, DO NOT repeat comments made previously for which replies have already been provided.

A web site address is being established that will allow you to look at different versions of Part N and the Implementation Guidance document. You should be able to see by color highlights where changes were made. If you do not already have a web site pass code you will need to contact Bruce Hirschler at bhirschler@crcpd.org to be provided a pass code so can access these documents.

The current Rationale document only describes the changes made from the last approved version of Part N to this 2002 draft version, but not changes to drafts between the two (including the 2001 Part N draft that was provided for peer review).

If you have questions regarding Part N or the Implementation Guidance document, please feel free to contact any member of the SR-5 Part N (TENORM) Task Force. The email addresses below are for the current SR-5 members--Robert Goff (MS), Thomas Cardwell (TX), Steve Collins (IL), Chairman of SFI-5, and Thomas Hill (GA).

rgoff@msdh.state.ms.us; thomas.cardwell@tdh.state.tx.us;
collins@idns.state.il.us; thill@mail.dnr.state.ga.us

Thank you for your willingness to peer review these important CRCPD documents.
