

June 4, 1997

Mr. Tim McGinty
Project Manager, Spent Fuel Project Office
Nuclear Regulatory Commission
Washington, DC 20555-0001

SUBJECT: Request for Meeting, Confirmatory Action Letter NMSS 96-01 Status

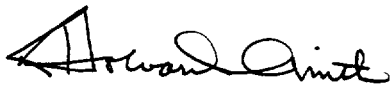

Dear Mr. McGinty:

Confirming our recent telephone conversation, NAC International (NAC) would like to request a meeting with NRC staff. The purpose of the meeting will be for NAC to provide an update regarding actions we have either taken or planned to resolve the issues associated with the subject Confirmatory Action Letter (CAL). As discussed, July 10, 1997 is our preferred date, if that is acceptable to the NRC. We believe that approximately three hours (9:00 AM to noon) should provide ample time for our presentation.

As proposed, we would like to discuss enhancements as relate to three general areas; our formal Quality Assurance Program, NAC personnel, and our licensed hardware. An overhead viewgraph projector would be appreciated if one is available. None of the information we will present is considered to be proprietary. NAC's presentation team will be lead by our President and Chief Executive, Mr. Ed Davis. Supporting Mr. Davis, our presentation team is currently planned to include Howard Smith (Vice President, Quality), Jim Viebrock (Vice President, Site Transportation Services) and Charlie Pennington (Vice President, Engineering Design Services).

Please advise if this request is acceptable.

Sincerely,

R. Howard Smith
Vice President, Quality
