Attention: Document Control Desk
Washington, DC 20555

Millstone Power Station, Unit Nos. 2 and 3
Technical Specifications Change Requests 2-21-01 and 3-18-01
Relocation of Selected Technical Specifications Related to the Reactor Coolant System
and Plant Systems

In a letter dated February 14, 2002,⁽¹⁾ Dominion Nuclear Connecticut, Inc. (DNC) proposed to amend Operating Licenses DPR-65 and NPF-49 by incorporating changes into the Technical Specifications of Millstone Unit Nos. 2 and 3, respectively. The proposed changes relocate selected Millstone Unit Nos. 2 and 3 Technical Specifications related to the Reactor Coolant System and Plant Systems to the respective facility's Technical Requirements Manual (TRM). For Millstone Unit No. 2, the changes affect Technical Specifications 3/4.4.9.1, "Pressure/Temperature Limits," 3/4.7.2.1, "Steam Generator Pressure/Temperature Limitation," 3/4.7.5.1, "Flood Level," 3/4.7.7.1, "Sealed Source Contamination," and 3/4.7.8, "Snubbers." For Millstone Unit No. 3, the changes affect Technical Specifications 3/4.4.9.1, "Pressure/Temperature Limits," 3/4.7.2, "Steam Generator Pressure/Temperature Limitation," 3/4.7.6, "Flood Protection," 3/4.7.10, "Snubbers," 3/4.7.11, "Sealed Source Contamination," and 3/4.7.14, "Area Temperature Monitoring."

Relocation of the selected Technical Specifications is based on the fact that the Technical Specification requirements do not meet any of the four criteria in 10 CFR 50.36(c)(2)(ii) for inclusion in the Technical Specifications. The proposed changes are consistent with the Standard Technical Specifications for Westinghouse and Combustion Engineering Plants.^{(2), (3)} Currently the Nuclear Regulatory Commission

⁽¹⁾ J. Alan Price to the Nuclear Regulatory Commission, "Millstone Nuclear Power Station, Unit Nos. 2 and 3, Technical Specifications Change Requests 2-21-01 and 3-18-01, Relocation of Selected Technical Specifications Related to the Reactor Coolant System and Plant Systems," dated February 14, 2002.

⁽²⁾ "Standard Technical Specification, Westinghouse Plants," NUREG-1431, Rev. 2, April 2001.

⁽³⁾ "Standard Technical Specification, Combustion Engineering Plants," NUREG-1432, Rev. 2, April, 2001.

A001

(NRC) is reviewing Industry/Technical Specification Task Force (TSTF), Standard Technical Specification Change TSTF-372, Rev. 2, which proposes changes to the Standard Technical Specifications to allow a delay time for support systems (e.g. snubbers) which cannot perform their required support function before the supported systems are declared inoperable. Approval of TSTF-372 will impact the proposed changes to Millstone Unit No. 2 Technical Specification 3/4.7.10, "Snubbers," and Millstone Unit No. 3 Technical Specifications 3/4.7.10, "Snubbers" and 3/4.7.14, "Area Temperature Monitoring."

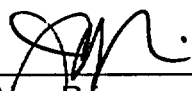

Accordingly, DNC is hereby withdrawing the proposed changes related to Millstone Unit No. 2 Technical Specification 3/4.7.10, and Millstone Unit No. 3 Technical Specifications 3/4.7.10 and 3/4.7.14 from our request dated February 14, 2002. This action will not affect the conclusions of the Safety Summary, Significant Hazards Consideration or Environmental Considerations provided in our license amendment request dated February 14, 2002.

There are no regulatory commitments contained within this letter.

If you should have any questions on the above, please contact Mr. Ravi Joshi at (860) 440-2080.

Very truly yours,

DOMINION NUCLEAR CONNECTICUT, INC.

J. Alan Price
