Re: McGuire Nuclear Station Unit 1 Docket No. 50-369  
McGuire Nuclear Station Unit 2 Docket No. 50-370  
Changes to Emergency Plan Implementing Procedures

Attached to this letter are a revised Emergency Plan Implementing Procedure (EPIP) Index and a notice of revision to one (1) Emergency Plan Implementing Procedure. This procedure revision was evaluated pursuant to the requirements of 10 CFR 50.54 (q). This change does not constitute a reduction in the effectiveness of the emergency plan and the plan continues to meet the requirements of 10 CFR 50.47 (b) and 10 CFR 50 Appendix E. Duke implemented this change on August 15, 2002. A copy of this change is also being sent to the NRC Office of Nuclear Material Safety and Safeguards as per 10 CFR 72.44 (f). The following procedure index change and procedure revision has been implemented:

EPIP Index Page 1	Dated 8/15/2002

REVISION to the following procedure:  
HP/0/B/1009/023 Dated 8/15/2002, Rev 005

There are no new regulatory commitments in this document. Duke is also supplying two copies of this submittal to the Regional Administrator of Region II. Questions on this document should be directed to Kevin Murray at (704) 875-4672.

Very truly yours,

H. B. Barron

## Environmental Monitoring for Emergency Conditions

### INFORMATION USE

#### 1. Purpose

To provide a systematic method for identifying airborne plumes or liquid effluents, and obtaining field data indicative of the radiation exposure to the general public, following a release of radioactive material.

#### 2. References

- 2.1 HP/0/B/1009/027 (Operation of ESP-2)
- 2.2 PT/0/A/4600/088 (Functional Check of Emergency Vehicle and Equipment)
- 2.3 SH/0/B/2005/002 (Protocol for the Field Monitoring Coordinator During Emergency Conditions)

#### 3. Limits and Precautions

- 3.1 During drills/exercises, Field Monitoring Team(s) (FMTs) shall **NOT** be required to don respirators. This is to assure safe vehicle operation during drill/exercise. During emergency situations respirator use may be required.
- 3.2 FMT personnel shall be aware of dose and dose rate alarm setpoints on DMC-2000s used in the field. Dose and dose rate alarms are referenced on RWP 98.
- 3.3 After the use of any Emergency Kit, a full inventory of that kit is required per PT/0/A/4600/88 (Reference 2.2). The checklist in the kit shall be signed and dated each time the kit is inventoried.

#### 4. Procedure

- 4.1 Field Monitoring Team (FMT) Activation and Dispatch
  - 4.1.1 Upon activation of the Emergency Response Organization, report to the OSC.
    - Form two teams to perform initial surveys for plume boundary. **IF** necessary dispatch additional beta/gamma monitoring teams.
    - Drivers for Field Monitoring Vehicles are provided by C&F. Ensure that each team has a driver prior to leaving the OSC.

- Personnel **NOT** trained for emergency response may assist a trained Radiation Protection Technician to do surveys and/or drive emergency vehicles.
  - Communicate team assignment to the OSC RP Supervisor, or qualified designee.
- 4.1.2 The OSC RP Supervisor, or qualified designee, shall brief at least one member of each FMT on current plant conditions (plant status, release in progress, emergency classification).
- 4.1.3 Following the plant status brief from the OSC RP Supervisor, obtain current meteorological data using the guidance in Enclosure 5.11.
- 4.1.4 **WHEN** directed, make preparations for dispatch by completing pre-dispatch portion of Enclosure 5.1 (Sample Van) or Enclosure 5.2 (Survey Vehicle).
- The Radiation Protection Manager can elect to dispatch FMT's at his/her discretion.
- 4.1.5 Follow FMC direction concerning protective dress requirements according to existing conditions per RWP-98.
- 4.2 Field Monitoring Team (FMT) Communications
- 4.2.1 Maintain open radio communications with the FMC. **IF** the radio becomes inoperable, telephone:
- TSC Dose Assessment 875-4976
- FMC at EOF (704) 382-0735/0736
- RP Sample Van 1 (cellular phone) 534-1563
- RP Sample Van 2 (cellular phone) 534-1564
- 4.2.2 Provide pertinent, general information. Do **NOT** provide detailed, specific plant information.
- 4.2.3 During a drill, repeat the statement, "This is a drill", or, "This is an exercise message", with each radio transmission using the proper radio call signs (Base - WQC700, Mobile -KA82138).
- 4.2.3.1 The Base Station must give the radio call sign with each transmission.

- 4.2.3.2 The field teams do **NOT** have to use the radio call sign when addressing the Base Station. The field teams must give the radio call sign when addressing other field teams.
- 4.2.3.3 For any backup sampling vans from other stations, the call sign shall be preceded by the station name (example "Oconee sample van 1").
- 4.2.3.4 Vehicles drawn from the McGuire garage that are designated as beta/gamma survey teams shall use 'alpha, bravo, charlie, and delta' designations during radio messages.
- 4.2.3.5 **WHEN** transmitting vital information, use repeat back method of communications and the phonetic alphabet.
- 4.2.3.6 Follow FCC guidelines for radio communications at all times.

#### 4.3 Locating and Tracking the Plume

- 4.3.1 Begin plume boundary identification by monitoring dose rates while traversing east and west of the site ( $\approx 0.5$  miles), traveling on owner controlled roads only.
  - 4.3.1.1 East of site - travel from the Hwy. 73 (stoplight) entrance to the MOC to the end of the discharge canal fishing area.
  - 4.3.1.2 West of site - travel from the medical facility parking lot to approximately the lower level intake using the road by the Initial Holdup Pond.
  - 4.3.1.3 Communicate location to the TSC and/or EOF when plume edge is identified. Any change in background dose rate shall be assumed to indicate plume edge. Communicate changes in dose or count rates immediately.
  - 4.3.1.4 Do **NOT** enter the plume unless directed by the FMC.
- 4.3.2 Be prepared to take full direction from the Field Monitoring Coordinator (FMC) at the EOF, when that position is prepared to do so.
  - 4.3.2.1 Major roadways delineate major territories surrounding the plant. Either all or a portion of these sections would be expected to be affected to some degree by radioactivity released from the plant. Utilize major roadways to access suspected regions (outer edges, leading edge(s), centerline) of the plume, as necessary.

- A. Major roadways on the EPZ map are identified by numerical designations and responsibility level (federal, state, county or city) designations.
  - B. Selected roadways on the EPZ map are identified by a specific name, rather than a numerical responsibility designation.
- 4.3.2.2 Each predetermined sampling location is denoted by a red text oval on the map. The sampling point designator indicates the protective action zone the point is in and the mileage from the plant.
- A. The FMC should use the points as landmarks when directing the teams.
  - B. The point locations can be read directly from the map or from the directions in Enclosure 5.6.
- 4.3.2.3 While enroute and at sampling locations, report the maximum radiation level, and location of plume boundaries to the FMC.
- 4.3.2.4 Record radiation dose rates and sample results on Enclosure 5.7.
- 4.3.2.5 Once a release has occurred, close vehicle windows and place ventilation off or on recirculation to minimize contamination until the plume area is identified.
- 4.3.2.6 Ensure that count rate meter is on and is monitored during transport to sampling locations.
- 4.3.2.7 **IF** any equipment becomes inoperable, notify the FMC and await further instructions.
- 4.3.2.8 Record plant status update information on Enclosure 5.8.
- 4.3.2.9 Verify worker classification changes on RWP with changes in plant conditions.
- 4.3.2.10 Record any or no exposure received and turn in dose cards upon returning to site. Submit dose cards as record for all drills and exercises.

**CAUTION:** Park vehicles completely off the road when sampling and use emergency flashers and the strobe while stopped.

Wear reflective vests when leaving a vehicle parked on the roadside for sampling. Vests are stored in the rear section cabinet with protective clothing.

4.4 **WHEN** directed, collect additional environmental samples, including but **NOT** limited to: air samples, smears of surrounding areas, integrated dose over a period of time with TLDs, vegetation, sediment, water, and milk, as requested by the FMC. Label and save each for analysis. FMTs may also be requested to retrieve and replace environmental air samplers and/or TLDs.

4.4.1 To collect a vegetation sample, use the shears to cut enough broad leaf vegetation to fill a 12"x12" poly bag.

4.4.2 To collect a soil sample, estimate one square foot of soil and dig out one inch deep.

4.4.3 To collect a water sample, fill a one gallon cubitainer. For differences in elevation, or samples that are difficult to obtain, use the limnological sampling equipment (see Enclosure 5.3).

4.4.4 To perform a contamination survey, take smears on stationary, horizontal surfaces, e.g. mailboxes, gas pumps, etc., Do **NOT** perform contamination surveys on automobiles!

4.4.5 To collect an air sample:

**NOTE:** Be aware of terrain during air sampling or surveying (i.e., windbreaks formed by landscape or vegetation) which could inhibit acquiring representative samples.

4.4.5.1 Position sample van air sampling port in the direction of the plant.

4.4.5.2 Load Particulate and Charcoal (P&C) cartridge into P&C holder.

4.4.5.3 Remove the cover from the air sampling port.

4.4.5.4 Insert P&C holder into the sample port to ensure outside air is sampled.

4.4.5.5 Start air sampler and run for required time. (Normal air sample is 5 minutes at 2 CFM).

- 4.4.5.6 Stop the air sampler.
- 4.4.5.7 Remove P&C holder from the air sampling port.
- 4.4.5.8 Replace cover on air sample port.
- 4.4.5.9 Move van to a low background area.
- 4.4.5.10 **WHEN** van is no longer in the plume, purge the P&C by permitting 15 ft<sup>3</sup> of air to flow through the sample cartridge. (7.5 minutes @ 2 cfm)
- 4.4.5.11 Remove the P&C from the P&C holder.
- 4.4.5.12 Separate the P&C.
- 4.4.5.13 Label particulate and charcoal and retain the particulate filter for gamma spec analysis.
- 4.4.5.14 Count the air sample charcoal cartridge, document and report results using Reference 2.1.
- 4.4.5.15 Retain the charcoal cartridge for further analysis.

#### 4.5 FMT Turnover

- 4.5.1 FMTs shall be relieved as directed by the FMC.
- 4.5.2 Provide turnover to the relief FMTs, using Enclosure 5.10.
- 4.5.3 Turn in all data sheets to the FMC as directed.
- 4.5.4 After being relieved, report to a counting facility designated by the FMC for a post-job BBA.

## SAMPLE VAN FMT CHECKLIST

**PRE-DISPATCH**

- Ensure that current plant status and meteorological information has been obtained.
- Obtain Emergency key set (#905 and 906) from Security at the PAP. Proceed to the equipment storage area (Room 158 of the Administration Building) and unlock the equipment storage locker.
- Obtain the following equipment: Normal issue TLD, electronic dosimeter (DMC-2000) and a dose card. Sign in on RWP-98. Ensure the DMC-2000 is on and has been re-zeroed. ED alarm setpoints are 50 mR/hr (dose rate) and 15 millirem (accumulated dose). ED's are reset by placing in the manual reader provided.
- Obtain portable instruments (ion chamber and count rate meters) and source check. Survey the area for radiation levels.
- Remove portable radios from chargers (one unit for each FMT). Screw in the antenna to the top of the radio. Turn the off/on/volume control switch on the top of the radio until SELF TEST is displayed on the front. **IF** MCGUIRE C17 does **NOT** display after SELF TEST, turn the numbered switch on the top of the radio to position 3 and lock with the locking ring. Ensure that the small toggle switch is set to position "A".
- Test the radios using the mobile call sign: "**WQC 700, McGuire Base, this is KA8-2138, portable radio check. Do you copy?**" **IF** McGuire Base does **NOT** respond, perform radio checks with the other sample van using the mobile call sign "**KA8-2138, Sample Van \_\_\_\_\_** (other sample van), **this is Sample Van \_\_\_\_\_** (your sample van) **portable radio check. Do you copy?**"  
  
**IF** a radio does **NOT** function, remove it from service by removing the battery. Ensure that the radio is turned off before removing or replacing any battery.
- Obtain all other necessary equipment: respirators, ESP-2's and check sources. Obtain canvas bags ESK-1 or ESK-2 (sample van kits). They can be used to carry instruments and respirators. All protective clothing is located in the back cabinet of the sample vans.
- One team shall call the TSC Dose Assessor at 875-4976 to determine the status of any release and communicate this information to the other teams.
- Proceed to the sample vans monitoring portable instruments in transit. Start sample van engines and stabilize inside temperature.
- Turn on the sample van radio. The unit will display SELF CHECK and MCGUIRE in sequence. **IF** MCGUIRE is **NOT** displayed after SELF CHECK, press the MODE key until MCGUIRE is displayed.
- Test the radios using the mobile call sign: "**WQC 700, McGuire Base, this is KA8-2138, sample van 1 (or 2). Do you copy?**" **IF** McGuire Base does **NOT** respond, perform radio check with the other sample van using the mobile call sign: "**KA8-2138 Sample Van \_\_\_\_\_** (other sample van), **this is Sample Van \_\_\_\_\_** (your van). **Do you copy?**"

## SAMPLE VAN FMT CHECKLIST

- Turn on the cellular phone. Unlock the phone for use by pressing the last three (3) numbers of the cell phone number. Test the phone by calling TSC dose assessment at 875-4976. It may be necessary to move the vans from under the unit high voltage lines to test the cellular phones.
- Start the power inverter (located behind the left side of the driver's seat) to the ON position. The air sampler and plug mold strip are now energized. The air sampler is located on the left side arm rest, back seat.
- Set up ESP-2's. Perform background and source checks in accordance with HP/0/B/1009/027. Sample vans should perform background and source checks while the van is stationary. Report any problems to the TSC/EOF.
- Notify TSC Dose Assessors that pre-dispatch checks are complete and: (circle one)
  - a. Sample Van \_\_\_\_\_ (1,2) is proceeding west of the plant to traverse from Medical Facility parking lot to approximately the lower level intake using the road by the initial holdup pond.
  - b. Sample Van \_\_\_\_\_ (1,2) is proceeding east of the plant to traverse from Hwy 73 (stop light) entrance to the MOC to the end of the discharge canal fishing area.
  - c. Sample Van \_\_\_\_\_ (1,2) is standing by at \_\_\_\_\_ (location).

**UPON RETURNING TO THE SITE:**

- Ensure mobile van radios are switched off.
- Ensure that power inverter is turned to the OFF position.
- Perform inventory of protective clothing and emergency equipment per PT/0/A/4600/088. (Notify the RP Staff Scientist of any discrepancies.)
- Turn off all instruments and portable radios and place in storage cabinet.
- Remove portable radio antennas and place radio into a charging unit.
- Ensure that EDs display the calibration date and place in storage cabinet.
- Ensure that storage cabinet is closed and locked.
- Turn in all relevant surveys and checklists.
- Turn in dosecards to DRC.
- Return keys to Security at the PAP.

## SURVEY VEHICLE FMT CHECKLIST

**PRE-DISPATCH**

- Ensure that current plant status and meteorological information has been obtained.
- Obtain Emergency key set (#905 and 906) from Security at the South PAP. Proceed to the equipment storage area (Room 158 of the Administration Building) and unlock the equipment storage locker.
- Obtain the following equipment: a normal issue TLD, electronic dosimeter (DMC-2000) and a dose card. Sign in on RWP-98. Ensure the DMC-2000 is on and has been re-zeroed. ED alarm setpoints are 50 mR/hr (dose rate) and 15 millirem (accumulated dose). ED's are reset by placing in the manual reader provided.
- Obtain portable instruments (ion chamber and count rate meters) and source check. Survey the area for radiation levels.
- Remove portable radios from chargers (one unit for each FMT). Screw in the antenna to the top of the radio. Turn the off/on/volume control switch on the top of the radio until SELF TEST is displayed on the front. **IF** MCGUIRE C17 does **NOT** display after SELF TEST, turn the numbered switch on the top of the radio to position 3 and lock with the locking ring. Ensure that the small toggle switch is set to position "A".
- Test the radios using the mobile call sign: "**WQC 700, McGuire Base, this is KA8-2138, portable radio check. Do you copy?**" **IF** McGuire Base does **NOT** respond, perform radio check with one of the sample vans using the mobile call sign:  
  
"**KA8-2138, Sample Van \_\_\_\_\_ (1 or 2), this is a portable radio check. "Do you copy?"**  
  
**IF** a radio does **NOT** function, remove it from service by removing the battery. Ensure that the radio is turned off before removing or replacing any battery.
- Obtain the designated emergency kits ESK-3 or ESK-4 (canvas bags) from the locker. All other necessary equipment is located in the kits.
- Proceed to the McGuire Garage by personal vehicle or Sample Van. **IF** obtaining pool vehicles after hours, weekends or holidays, call Security from the Garage gate phone to gain access. The phone number is located on the phone housing.

**SURVEY VEHICLE FMT CHECKLIST**

- Notify the TSC Dose Assessor that pre-dispatch checks are complete and; (circle one)
- a. Survey Vehicle \_\_\_\_\_ (alpha, bravo, charlie, delta) is proceeding west of the plant to traverse from Medical Facility parking lot to approximately the lower level intake using the road by the initial holdup pond.
- b. Survey Vehicle \_\_\_\_\_ (alpha, bravo, charlie, delta) is proceeding east of the plant to traverse from Hwy 73 (stop light) entrance to the MOC to the end of the discharge canal fishing area.
- c. Survey Vehicle \_\_\_\_\_ (alpha, bravo, charlie, delta) is standing by at \_\_\_\_\_  
(location)

**UPON RETURNING TO THE SITE:**

- Perform inventory of emergency equipment per PT/0/A/4600/88 (Reference 2.2).  
Notify the RP Staff Scientist of any discrepancies.
- Turn off all instruments and portable radios and place in storage cabinet.
- Remove portable radio antennas and place radio into charging unit.
- Ensure that ED's display the calibration data and place in storage cabinet.
- Ensure that storage cabinet is closed and locked.
- Turn in all relevant surveys and checklists.
- Turn in dosecards to DRC.
- Return emergency key set to Security.

Accessible on Hwy 273, north of Duke Power Mt. Holly Training Center.

**Charlotte Intakes - Sector E (South) 5-6 miles**

Sample elevation 635' - Unit 1 intake

640 - Unit 2 intake

637' - Unit 3 intake

Accessible by land on SR 2004 (Mt. Holly-Huntersville Road)(Pump Station Road)

**LIMINOLOGICAL SAMPLING DIRECTIONS**

- (1) Pull one of the blue stoppers out of the end of the main tube and attach the wire loop to one of the small pins on the handle tripping mechanism.
- (2) Repeat for the other stopper.
- (3) Lower the bottle under water keeping the line taut, and drop the weight to strike the tripping mechanism. This will release the cables and close the bottle.
- (4) For shoreline sampling when the elevation difference is small, attach one stopper and fill the bottle with water by scooping. The bottle can now be closed and the black nozzle used to empty the sample into a cubitainer.

<p><b>NOTE:</b> 1. Full lake elevation is 760'. 2. Catawba River spillway elevation (for Charlotte intakes) is 647'6"</p>

Page 1 of 1

1. Pull in at the fueling island located at the McGuire Garage. The garage is located on the right side of the access road to the McGuire switchyard.
2. Place the special refueling key in the pump control station. The control station is located on a vertical steel beam which is located between the gas pump and the diesel pump.
3. Remove the key, and follow the instructions as they appear on the control station. The instructions include:
  - a. Enter the vehicle's mileage.
  - b. Enter the pump being used; 1 for gas, and 2 for diesel.
  - c. Enter your social security number.
4. Remove the nozzle, turn the pump on, and refuel the vehicle.
5. **WHEN** finished, turn the pump off, and return the nozzle to the pump.

The refueling pumps are opened 24 hours per day, 7 days a week. The McGuire Garage has personnel working in the garage from 7:30 AM to 12:00 AM Monday through Friday. Call Security from the garage gate phone to gain access to the pumps after hours or on weekends or holidays.

**IF** oil, antifreeze, or windshield washer fluid is needed, see McGuire Garage personnel.

**NOTE:** **IF** a computer is **NOT** available in the OSC, Meteorological Data may be obtained from any other LAN based computer or from the OSC Radiation Protection Supervisor.

1. From any LAN based computer:
  - a. Select DAE
  - b. Select Department Apps
  - c. Select Nuclear Generation
  - d. Select McGuire Desktop
2. Select **McGuire Process Data**.
3. Select **SDS**.
4. At the SDS screen, select either **Unit-1** or **Unit-2**. For drills, select **Simulator**.
5. Type in **GD ERORD 5**.
6. Obtain 10 meter (lower) wind speed and 60 meter (upper) wind direction from page 1 of 3.

Other MET Data (temperature and precipitation) is also found on page 1 of 3.
7. Use the 10 mile EPZ map and 90° plume marker located in the OSC to assist in determining where plume edge could be encountered. The plume marker will indicate 45° to either side of centerline wind direction.
