MEMORANDUM TO: James W. Andersen, Acting Chief, Section 2
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: Robert J. Fretz, Project Manager, Section 2 */RA/*
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: SALEM NUCLEAR GENERATING STATION, UNIT NO. 1 CLOSURE OF
TAC NO. MB3214 - THIRD INTERVAL INSERVICE INSPECTION
PROGRAM (TAC NO. MB3214)

On September 25, 2001, PSEG Nuclear LLC (PSEG) submitted information related to the Salem Nuclear Generating Station (Salem), Unit No. 1, Third Interval Inservice Inspection (ISI) Program (ADAMS Accession No. ML012760190). Included in this information were 12 separate requests for relief. Because the relief requests included the Salem, Unit No.2, and Hope Creek Generating Station ISI programs, the staff requested that the licensee withdraw these requests, and resubmit the Salem relief requests under separate cover. By letter dated July 8, 2002, PSEG resubmitted the 12 relief requests (ADAMS Accession No. ML022000519). Review of these requests are being performed under TAC Nos. MB5569, MB5570, and MB6086 through MB6102.

This completes all work under TAC No. MB3214. If you have any further questions, please let me know.

Docket No. 50-272
