U.S. NUCLEAR REGULATORY COMMISSION

Mr. Charles E. MacDonald, Chief
Transportation Branch
Division of Fuel Cycle and Material Safety
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. MacDonald:

Attached is a copy of the QUALITY ASSURANCE PROGRAM of
BABCOCK & WILCOX CO. implemented for MS-002-01
(Name of Licensee) (License Number)
in accord with requirements of 10 CFR Part 71, Appendix E.

Please let me know if other data needs to be submitted for
compliance with regulations for shipping radioisotopes
designed within the license number designated above.

Respectfully submitted,

Charlie Portera - Quality Control Manager
(Signature and Title of *Radiation Safety Officer*
Responsible Licensee Official)

P.O. Box 1297
West Point, Miss. 39773

QUALITY ASSURANCE PROGRAM

ORGANIZATION CHART

FOR

BABCOCK & WILCOX CO.
(Name of Licensee)

MS-002-01
(License Number)

FOR

COMPLIANCE WITH 10 CFR PART 71, APPENDIX E

(NOTE TO LICENSEE)

1. The Organizational Chart as used in the license application should be presented below the heading shown above. It may be advisable to designate the Radiation Safety Officer as the responsible individual for the Part 71 QA Requirements.
2. If you did not submit an Organizational Chart with your license application, Gamma Industries suggests that you use the chart format as attached for submission with Gamma Industries Form, #604-7001-001 2/79. (DO NOT SUBMIT TWO ORGANIZATIONAL CHARTS).

QUALITY ASSURANCE PROGRAM

OF

BABCOCK & WILCOX CO.
(Name of Licensee)

MS -002 -01
(License Number)

FOR COMPLIANCE WITH 10 CFR PART 71, APPENDIX E

1. Organization

The final responsibility for the Quality Assurance (QA) Program for Part 71 Requirements rests with BABCOCK & WILCOX CO.
(Name of Licensee)

Design and Fabrication shall not be conducted under this QA Program. The QA Program is implemented as shown on the attached organization chart.

The Radiation Safety Officer is responsible for overall administration of the program, training and certification, document control, and auditing.

The Radiographers are responsible for handling, storing, shipping, inspection, test and operating status and record keeping.

2. Quality Assurance Program

The management of BABCOCK & WILCOX CO.
(Licensee Name)

establishes and implements this QA Program. Training, prior to engagement, for all QA functions is required according to written procedures. QA Program revisions will be made according to written procedures with management approval. The QA Program will ensure that all defined QA procedures, engineering procedures, and specific provisions of the package design approval are satisfied. The QA Program will emphasize control of the characteristics of the package which are critical to safety.

The Radiation Safety Officer shall assure that all radioactive material shipping packages are designed and manufactured under a QA Program approved by Nuclear Regulatory Commission for all packages designed or fabricated after July 1, 1978. This requirement can be satisfied by receiving a certification to this effect from the manufacturer.

3. Document Control

All documents related to a specific shipping package will be controlled through the use of written procedures. All document changes will be performed according to written procedures approved by management.

The Radiation Safety Officer shall insure that all QA functions are conducted in accordance with the latest applicable changes to these documents.

12777

4. Handling Storage and Shipping

Written safety procedures concerning the handling, storage and shipping of packages for certain special form radioactive material will be followed. Shipments will not be made unless all tests, certifications, acceptances, and final inspections have been completed. Work instructions will be provided for handling, storage, and shipping operations.

Radiography personnel shall perform the critical handling, storage and shipping operations.

5. Inspection, Test and Operating Status

Inspection, test and operating status of packages for certain special form radioactive material will be indicated and controlled by written procedures. Status will be indicated by tag, label, marking or log entry. Status of nonconforming parts or packages will be positively maintained by written procedures.

Radiography personnel shall perform the regulatory required inspections and tests in accordance with written procedures. The Radiation Safety Officer shall ensure that these functions are performed.

6. Quality Assurance Records

Records of package approvals (including references and drawings), procurement, inspections, tests, operating logs, audit results, personnel training and qualifications and records of shipments will be maintained. Descriptions of equipment and written procedures will also be maintained.

These records will be maintained in accordance with written procedures. The records will be identifiable and retrievable. A list of these records, with their storage locations, will be maintained by the Radiation Safety Officer.

7. Audits

Established schedules of audits of the QA Program will be performed using written check lists. Results of audits will be maintained and reported to management. Audit reports will be evaluated and deficient areas corrected. The audits will be dependent on the safety significance of the activity being audited, but each activity will be audited at least once per year. Audit reports will be maintained as part of the quality assurance records. Members of the audit team shall have no responsibility in the activity being audited.
