Dr. Joseph P. Ring, Chairman
ANSI N13 Radiation Protection Committee
Harvard School of Public Health
Department of Environmental Health
46 Oxford Street
Cambridge, MA 02138-1903

Dear Dr. Ring:

This letter is a follow-up to our recent correspondence of August 22, 2002, in which we stated that due to resource constraints, the Nuclear Regulatory Commission (NRC) could not provide representation on the N13.60 Committee. After further evaluation, we have found the resources and offer the following nominees.

I would like to nominate Mr. Thomas B. Blount, as primary, and Dr. Stephen McGuire, as alternate, authorized representative on the N13.60 Committee. Mr. Blount is an Emergency Preparedness Specialist in the Office of Nuclear Reactor Regulation. In this capacity, Mr. Blount reviews NRC licensee emergency plan programs, including implementation of protective action measures consistent with regulatory guidance. Dr. McGuire is a Senior Emergency Response Coordinator in the Office of Nuclear Security and Incident Response. In this capacity Dr. McGuire provides oversight to the NRC's response to actual licensee events, including evaluation of protective measures.

In accordance with OMB Circular A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities," February 19, 1998, the participation on a committee of an authorized representative does not connote agency agreement with, or endorsement of, decisions reached by the committee's efforts. Agency representatives participating on standards developing groups will, to the extent possible, ascertain the views of the agency on matters of interest and will express views that are consistent with established agency views.

Correspondence should be addressed to:
