Desc: I would like to see the portion of the Nuclear Regulatory Commission License for the company "Radiocat" to see what their procedures are for releasing felines after thyroid ablation radiotherapy.

FeeCategory: Educational

Waiver_Purpose: Our veterinary school would like to change their release procedures and has asked us to make an ammendment to our license. We would like to see what the NRC feels is a reasonable procedure by viewing "Radiocat"'s license because they are very experienced with this type of procedure.

Waiver_ExtentToExtractAnalyze: Reviewing this information will help Purdue University to request a license ammendment to modify our procedures.

Waiver_SpecificActivityQuals: The specific activity was mentioned above. I have a degree in Health Physics and am gathering information for my Radiation Safety Officer.

Waiver_ImpactPublicUnderstanding: This will help Purdue to further education patients' owners on what the Nuclear Regulatory Commission deems is a safe level for release.

Waiver_NatureOfPublic: The people who are affected are owners of the patients. This is approximately 50 people per year.

Waiver_MeansOfDissemination: Patients will be provided information when the animals are released to go home.

Waiver_FreeToPublicOrFee: free

Waiver_PrivateCommericalInterest: The Purdue Veterinary School would like to be able to keep their procedures in line with those in private practice to assure that students are properly trained as to the procedures they will be using once they graduate.
