Kewaunee, WI 54216

SUBJECT: KEWAUNEE NUCLEAR POWER PLANT - CORRECTION TO ISSUANCE OF
AMENDMENT 162 (TAC NO. MB5386)

Dear Mr. Coutu:

On September 19, 2002, the U.S. Nuclear Regulatory Commission issued Amendment No. 162 to Facility Operating License No. DPR-43 for the Kewaunee Nuclear Power Plant. The amendment approved administrative changes to Technical Specification (TS) Table of Contents, Facility Operating License, Section 1 - "Definitions," Section 2 - "Safety Limits and Limiting Safety System Settings," Section 5 - "Design Features," and Section 6 - "Administrative Controls." Specifically, the administrative changes included capitalizing defined words, formatting section titles, renumbering pages and correcting miscellaneous grammar and punctuation errors.

Due to an administrative error, page TS 5.3-1 contains a typographical error using the word "allow" instead of "alloy." The error is located in TS 5.3.a, "Fuel Assemblies," in the fourth line, second word: "...zirconium allow or stainless steel filler rods for fuel rods, in accordance with NRC-approved applications of fuel rod configurations, may be used." The sentence should be corrected with the following: "...zirconium alloy or stainless steel filler rods for fuel rods, in accordance with NRC-approved applications of fuel rod configurations, may be used." In addition, due to an administrative error, TS page TS 5.4-1 contains two pen marks that appear as revision bars. These two marks should not be on the page. Enclosed are the corrected pages.

Sincerely,

/RA/

John G. Lamb, Project Manager, Section 1
Project Directorate III
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket No. 50-305

Enclosure: As stated
