Policy Development and Analysis Staff

**Subject: GE Request for Withdrawal of Proprietary Information from Public
Disclosure Grand Gulf Nuclear Station Unit 1(TAC No. MB3972)**

Entergy Operations, Inc. (Entergy), in the referenced letter, submitted Revision 1 to NEDC-33048, "Safety Analysis Report for Grand Gulf Nuclear Station Thermal Power Optimization" (TSAR), which supports a request for a power uprate. A proprietary and a non-proprietary version of the TSAR were provided. Through an administrative error, certain proprietary information was inadvertently retained in the non-proprietary version. In addition, GE will address comments received from the NRC Staff during a conference call on September 30, 2002. To address the comments, changes will be made in both the proprietary and non-proprietary TSAR. Therefore, GE, as the owner of this information, requests that Revision 1 of both of the TSARs be withdrawn.

GE will provide Entergy with Revision 2 of both of the TSAR documents.

If you have any questions, please contact Mike Lalor at (408) 925-2443 or myself.

Sincerely,

George Stramback
Regulatory Services, Project Manager
