<p><u>Summary:</u> Mr. Grahm called and left a message on my voice-mail. He was concerned that he was just given the NOV and tasked with drafting a response by his superiors. He had some questions on how to respond and timeliness issues.</p> <p>14:00 I called Mr. Grahm. He believed that the response to the letter had to be received by the NRC by September 4, 2002. I informed him that a response was required by the NRC by October 4, 2002, which was thirty days from the date of issuance of the letter. Mr. Grahm requested information as to which ECD's were leak tested when. I provided him with the information. Mr. Grahm remarked that a number of people have left the company who were involved in the use of the gas chromatographs which is why he was tasked with the response. I thanked him for his attention to the matter.</p>
