

OMB APPROVAL SECTION UPDATE CHECKLIST

G:\NMD\RMB\RIMS\OMBSECTN.WPD

CLEARANCE PACKAGE TITLE

10 CFR Part 30, Rules of General Applicability to Domestic Licensing of Byproduct Material

Check the appropriate box(es) for the type of clearance:

YES NO

Clearance Extension:

Sections listed in the OCP were compared with those listed in the on-line list of "OMB Approval Sections," and the on-line list was modified as necessary to include the sections listed in the OCP. The clearance extension request was checked to ensure that sections for all final rules that became effective during the previous 3 years have been included in or deleted from (as appropriate) the package and that these sections have also been included in and/or deleted from the on-line "OMB Approval Section." Final rules that are expected to become effective during the requested clearance period should also be included in the clearance package, but the on-line dataset should not be modified.

Proposed Rule:

The proposed rule adds to or deletes section(s) from the current on-line "OMB Approval Section."

A modified "OMB Approval Section" has been included in the proposed rule, or program office staff have been instructed to include such paragraph. (Do not modify the on-line dataset.)

Final Rule:

The final rule adds to or deletes section(s) from the current on-line "OMB Approval Section."

The "OMB Approval Section(s)" in the on-line list have been updated to include/delete the affected section(s).

An updated "OMB Approval Section" has been included in the final rule. (The "OMB Approval Section" may need to be modified from the one approved for the proposed rule to include sections implemented by other recent final rules.)
