comments: I did not see another location on your site that presented the opportunity to comment on the possible approval of this plant. As a concerned member of the public in Gallatin, TN, I want to express my opposition to that possibility. Not only are environmental and disaster issues a concern, but I am quite certain there would be security risks. With war and terrorism looming, I am doubtful the company would spend the money needed to protect the enriched uranium in such an isolated location. Thank you for your consideration. Carol Stout
