Attention: Ms. K. R. Cotton

Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION  
DOCKET NO. 50/395  
TECHNICAL SPECIFICATION AMENDMENT REQUEST - TSP 00-0075  
EMERGENCY FEEDWATER SYSTEM ISOLATION VALVES  
PROJECT DELAY LETTER

Reference: S. A. Byrne to Document Control Desk, RC-01-0190, Dated October 30, 2001

South Carolina Electric & Gas Company (SCE&G), acting for itself and as agent for South Carolina Public Service Authority, hereby provides a change to the docketed information provided in the above referenced letter.

On May 24, 2001, SCE&G submitted a Technical Specification amendment request for the Emergency Feedwater System, Specification 3/4.7.1.2. Due to resource issues this project was deferred and the amendment request was withdrawn, but the intent was to resubmit during Cycle 14. Additional study has been performed and a decision made that this plant change will not occur during Refuel 14. Should the decision to proceed with this project be made in the future, the amendment request will be resubmitted at that time.

Should you have questions, please call Mr. Melvin N. Browne at (803) 345-4141.

I certify under penalty of perjury that the foregoing is true and correct.

10/14/02  
Executed On

  
Stephen A. Byrne
