Docket Nos. 50-424  
50-425

Director, Office of Nuclear Material  
Safety and Safeguards  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Gentlemen:

**VOGTLE ELECTRIC GENERATING PLANT  
QA PROGRAM APPLICABILITY TO  
TRANSPORTATION ACTIVITIES**

During recent Quality Assurance (QA) activities, it was discovered that Georgia Power Company (GPC) had not notified the NRC of its intent to apply its previously approved QA program to transportation activities prior to first use as required by 10 CFR 71.101(f). All shipments subject to the provisions of 10 CFR 71 are covered, and have been covered since their initiation, by an applicable QA program previously approved under the provisions of 10 CFR 50, Appendix B. For the purpose of compliance with 10 CFR 71, this applies only to transportation and packaging activities and not fabrication of certified shipping casks.

Georgia Power Company's QA program for the Vogtle Electric Generating Plant was submitted in the Operating License application (FSAR) on June 22, 1983. Approval of the application for an Operating License for Unit 1 was granted on March 16, 1987 and, for Unit 2, on March 31, 1989.

Additionally, in accordance with 10 CFR Part 170.31, a fee of \$230.00 is enclosed with this application.

Sincerely,

*C.K. McCoy*
