MEETING MINUTES: Internal IMC 0350 Oversight Panel Meeting
Davis-Besse Nuclear Power Station

DATE: October 29, 2002

TIME: 1:00 p.m. Central

ATTENDEES:

J. Grobe	A. Mendiola
W. Dean	J. Jacobson
R. Gardner	J. Hopkins
B. Jorgensen	D. Simpkins

Agenda Items:

1. Site activities (RIO)

Doug Simpkins briefed the Davis-Besse Oversight Panel on current site activities noting the following:

- Work on the auxiliary boiler, to prepare the plant for cold weather, should be completed 10/29.
- Containment painting continues; a path forward on coatings for conduits and cables has not been selected.
- Containment Air Cooler #3 motor had to be returned to the vendor because "sponge blasting" FME was inadequate and gritty material got into the fan motor oil.
- FENOC was meeting with Framatome on 10/29 (Scott Thomas attended) to report conclusions and recommendations about potential indications of RCS leakage at a reactor vessel bottom nozzle.

2. Process Plan

The Panel deferred detailed discussion of the revised Process Plan pending availability of Dave Passehl, who was not present due to illness.

3. Inspection Schedules

Mel Holmberg has de-briefed with Jack Grobe and his inspection report is in preparation. The report will make selected URIs and "open" issues clear, so that follow-up is ensured.

The Panel discussed the fact that licensee schedules remain unsettled, affecting the dates when sufficient information to justify further inspection activities will be available. The Oversight Panel concurred in a proposed series of meetings among the Panel

Manager, inspection team leaders and supervisors, to consider how to “manage” resources and scheduling, as follows:

A meeting will be held among Marty Farber, Ron Gardner and Jack Grobe on Wednesday, November 6, 2002 to discuss the status, findings, and path forward on engineering inspection activities. Geoff Wright will also de-brief with Jack Grobe later this week.

The Panel reviewed Ken O'Brien's proposed schedule. Jack Grobe will discuss the schedule with Dave Hills and Ken to clarify scope and schedule issues.

The question of applicability of TI 2515/150 to the current Davis-Besse outage has been determined: the TI is not applicable at this plant until the next outage.

A draft licensee “Return to Service Progress Chart” was briefly discussed. The Panel will review this chart preparatory to further discussion at the next meeting.

4. Re-Start Checklist

Proposed addition of the issue of “incomplete/inaccurate information” to the NRC restart checklist was discussed. The Panel deferred a decision to the next meeting (11/5) pending re-examination of the AIT followup inspection report. The Panel will then look to approve the revised checklist next week.

5. Re-Start Action Matrix (RAM)

The Panel discussed the RAM, and potential additions to the RAM. Incoming items from stakeholders will be selectively added to the RAM and, beginning with next week's (11/5) Panel meeting, items will be specifically CLOSED when appropriate, after Panel discussion, and the RAM updated to serve as the record of the action.

6. Review of Action Items

The panel deferred review of the list of “open” action items to the next meeting, considering the absence of persons with key information on the items.

7. Licensing Issues/Actions

A memo from NRR to RIII (Zwolinski to Dyer) was expected to be signed out 10/29 to support issuance of a letter from RIII to FENOC to “release” the quarantine on the old reactor vessel head. The memo contained recommended language for the RIII letter.

Official NRC “acceptance” of the licensee's revised “Technical Root Cause” report is pending. This was to be discussed further with the licensee during the routine weekly call on 10/30.

UCS continues to submit “green ticket” correspondence - the latest being a comparison purporting to show the NRC is implementing MC 0350 differently at Davis-Besse than it did at D. C. Cook just a couple of years ago.

NRR is moving forward on its TIA assessment and response relating to use and results from the Significance Determination Process, not waiting for FENOC to update its safety significance assessment, probably in January.

8. Items for Weekly Licensee Call

Potential issues which might be appropriate to discuss during the 10/30 call with the licensee were reviewed. The Panel endorsed discussion of the following: “official” NRC acceptance of the licensee’s (revised) Technical Root Cause report; arranging a separate call to discuss any further “loose ends” relating to analyses of the specimen from the reactor head; NRC use of photos from the licensee on the Website; and, potential concerns relating to FENOC resources being shifted to Davis-Besse to the detriment of Beaver Valley and/or Perry.

9. Future Activities/Plans/Meetings

Next panel meeting: Tuesday 11/5 at 2:00 p.m. EDT, 1:00 CDT

The Panel also discussed future site visit/tour schedules. At present, the expectation is that Sam Collins will visit the site concurrently with the next regular set of monthly meetings (11/13) and Brian Sheron, accompanied by either John Zwolinski or Tad Marsh, will visit the site concurrently with the LLTF meeting 11/20. The LLTF contingent will be about nine persons, and Sam Collins may make a concurrent return visit also.
